For some reason Neat has said they wont code-sign the older scanner drivers and thus people with those older scanners have to follow a second guide.. Instead I created an identical folder and Submitter structure on my Mac that mimics folders in my Neat repository.. It gets even harder when I try to solve problems on both accounts and explain that I run both inheritance and current software platforms.

But as long as you have the driver installed you can use the mac image capture program to do the scan.. This scanner absolutely rocks I am amazed at how fast it is and look forward to getting a lot of stuff scanned.. However as long as you have installed the driver you can use the Mac Image Capture application to perform Scan.. It gets even more challenging when Im trying to resolve problems on both accounts and explain that Im running both legacy and current software platforms. [Mac Monitors For Photo Editing](#)
